

 **EQUITONE**  
Fibre cement facade materials

EQUITONE material sampler

The logo consists of a square icon on the left, divided into four horizontal sections with different textures: a top section with vertical lines, a second section with a dark, grainy texture, a third section with a lighter, grainy texture, and a bottom section with a dark, grainy texture. To the right of the icon, the word "EQUITONE" is written in a bold, uppercase, sans-serif font. A small vertical line is positioned below the letter 'I' in "EQUITONE".

# EQUITONE

EQUITONE is a through-coloured facade material designed by and for architects. Our company has produced these façade panels since the 1950's under the name "ETERNIT". Every EQUITONE panel is unique, showing the raw, untreated texture of the fibre cement base material. Fibre cement is a cement composite material that consists of cement, cellulose and mineral materials, reinforced by a visible matrix. Nothing else. The EQUITONE material comes in a maximum panel size of 1,25 x 3m (4' x 10') and can be transformed in any size or shape in the workshop or on-site. Furthermore, the material can be perforated or printed. Visible and invisible rainscreen fixing methods include riveting, screwing and bonding on metal or wood supporting frames. No matter what design options you explore, the through-coloured nature of EQUITONE assures crisp, monolithic details.

# EQUITONE [ linea ]

EQUITONE [linea] is a 3D shaped, through-coloured fibre cement facade material that plays with light and shadow. Linea displays a linear embossing modelled on the size and shape of a human finger. Every moment of the day, the changing angle of the daylight gives the material a different aspect. Every EQUITONE [linea] panel is unique, displaying the raw and untreated inner texture of the core fibre cement material.

The fibre cement material comes in a large panel size and can be transformed into any size or shape in the workshop or on site. No matter what design options you explore, EQUITONE's through-coloured nature guarantees crisp, monolithic details. Both face and back fastening options have been developed for EQUITONE [linea].

# EQUITONE [tectiva]

EQUITONE [tectiva] is a through-coloured facade material, characterised by a sanded surface and naturally occurring hues within the material.

Every tectiva panel is unique, strongly expressing the raw texture of the core eternit fibre cement material. The material comes in a large panel size and can be transformed into any size or shape in the workshop or on site. No matter what design options you explore, EQUITONE's through-coloured nature guarantees crisp, monolithic details.

# EQUITONE [materia]

EQUITONE [materia] is a through coloured facade material that accentuates the beauty of fibre cement.

The material encompasses the characteristics of cement, whereas the fibres render its surface textured yet velvety.

The ever-changing atmosphere, gives the material natural subtle shade variations.

The material comes in large panel size and can be transformed into any size or shape in the workshop or on site.
